

TRANSPORTATION POLICY

SEALED LEAD ACID BATTERY SYSTEMS

This document was designed by Eco-Charge to make it easier for travel industry personnel and our valued customers to quickly and easily recognize that the battery:

- 1. Meets pressure, vibration and special provision A67 crack/rupture test of the International Air Transport Association (IATA) / International Civil Air Organization (ICAO).
- 2. Is exempt from the US Department of Transportation Hazardous Materials regulations contained in Title 49 of the Code of Federal Regulations (CFR), parts 171-185.
- 3. Is not restricted for water transport and is classified as non hazardous per IMDG Amendment 27.

Please note the following regulations for transportation of sealed lead-acid batteries:

- 1. SLA batteries can be transported by any means of transportation by truck, rail, ocean or air. This includes UPS, FedEx and USPS.
- 2. The batteries need to be properly packaged for protection against short circuits and secured in a rugged outer package.

All Eco-Charge batteries manufactured after April 2003 will include the following statement printed on the main battery label.

Eco-Charge SLA batteries are unregulated by the DOT for transportation by truck, rail, ocean and air transport becuase they meet the requirements of 49 CFR 173.159
